In order to stay within the specified yarn amounts (1 mini hank per color), use long tail cast on, check your gauge frequently throughout the project and leave tails between 3 and 5".

To adjust the circumference, cast on more or fewer stitches in multiples of 4. Please note that this will affect the total yardage.

FINISHING

Weave in all ends (except C27). **Block to finished dimensions.**

Return held sts to ndl. Remove provisional CO; place recovered sts onto spare ndl.

For a standard cowl, graft the ends together using C27 and Kitchener Stitch.

For a twisted cowl, lay the cowl flat, then flip one narrow edge 180 degrees before grafting the ends together using C27 and Kitchener Stitch (the placement of the stitches on the needles may need to be adjusted before grafting).
